Community Interest Statement

Commercial Foundation CIC exists to support young adults aged 16–25 who face barriers to employment, education, or training.

We work with young people who may lack confidence, qualifications, work experience, or access to opportunities, helping them build skills, resilience, and belief in their own potential. Through our employability programmes, mentoring, and real-world work experience, we provide practical pathways into work or further education.

Our trading activities, including digital print and fulfilment services, generate income that is reinvested directly into delivering our social mission. Any surplus is used to sustain and develop our programmes for the benefit of the community we serve.

As a Community Interest Company, Commercial Foundation CIC operates with an asset lock, ensuring that all profits and assets are used to create positive social impact and cannot be distributed for private gain.
